

Jeffrey J. McDonnell is Professor and Richardson Chair in Watershed Science at the Department of Forest Engineering, Oregon State University. Professor McDonnell has received many awards and honors including: the Gordon Warwick Award, British Geomorphological Research Group; Fellow of the International Water Academy; Horton Research Grant, American Geophysical Union; Nystrom Award, Association of American Geographers. He has recently delivered the Penman Lecture to the British Hydrological Society, The Boussinesq Lecture to the Boussinesq Centre in The Netherlands and the Frontier Lecture to the American Geophysical Union. He is a registered professional hydrologist with the American Institute of Hydrology. Prof. McDonnell has been the STINT Fellow at the University of Stockholm, Gledden Fellow, University of Western Australia; Leverhulme Fellow at Bristol University; Hayward Fellow at Landcare New Zealand; STA Fellow at Japan Forest Products and Forest Research and USRA Fellow at NASA Marshall Space Flight Center. He is past President of the International Commission on Tracers and is the current Chair of the IAHS Decade on Prediction in Ungauged Basins. He has served as Associate Editor for the journals Water Resources Research, ASCE Journal of Hydrologic Engineering, Hydrological Sciences Journal and Hydrological Processes. He is now Associate Editor for Journal of Hydrology, Hydrology and Earth Systems Science and Editorial Board Member for Hydrological Processes and the Geography Compass. He has authored or co-authored more than 150 journal articles. He has also edited several texts including the Elsevier textbook (together with Carol Kendall) "Isotope Tracers in Catchment Hydrology". Recently he has served as Senior Advisory Editor of the "Encyclopedia of Hydrological Sciences", published by John Wiley and Sons and is currently Editor-in-Chief of the IAHS Book Series "Benchmark Papers in Hydrology".
