FOREST DISCOVERY TRAIL

## Dr. William Ferrell Forest Discovery Nature Hunt!

### Welcome to the OSU Research Forest.

The OSU Research Forest is managed by the College of Forestry and serve as a living laboratory and outdoor classroom for students, researchers and managers to learn about forest ecosystems and management.

The Forest Discovery Trail is located in the Research Forest and honors Dr. William Ferrell, the first forest ecologist hired by the College of Forestry.

Use this guide to seek out species that are common in our forests on this illustrated nature hunt. Find your way to learn more about plants, animals, and fungus and why they make our neighboring forests their home.
